

harvest

WHO WE ARE

In 2016, a group of commercial lending veterans teamed up to bring capital to a wider range of small business owners.

Based out of Orange County, California and backed by strong capital partners, Harvest set out to enhance the tired and outdated model of SBA and commercial real estate finance; bringing a better lending experience to borrowers and business partners alike.

During the first year, Harvest earned the prestigious rank of top 10 SBA lender in California. Today, Harvest is one of the most active SBA lenders in the country. So, what can Harvest do for you? We start with eliminating red tape. We think outside the traditional bank lending-box because we are not a bank. We are problem solvers, we save deals, and we get things done.

As a non-bank direct lender, Harvest is not subject to grueling bank regulations and relationship requirements. What this means is Harvest delivers; quickly and smoothly. Our lending professionals offer customized solutions for small businesses on owner-occupied, business-use properties. Harvest is able to help a wide range of businesses, from well-qualified seasoned operators to the most challenging credits that others typically pass on.

Having this type of flexibility and resources makes Harvest a one-stop shop. Our people are skilled and flexible, working fiercely to navigate your unique situation. As an SBA PLP lender and one of only 14 SBLC's in the country, Harvest is built to perform, meet deadlines, and deliver on-time, every time!
